1
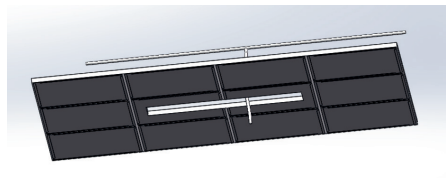

Open a slot of 340 x 63 mm on the ceiling, and lead out the wire.

2
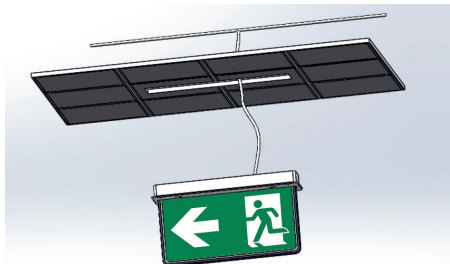

Connect the lead wire to the external lead wire of the sign (pay attention to the corresponding connection of live wire/neutral wire).
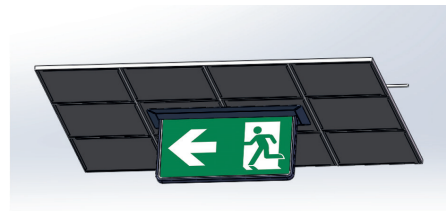

3
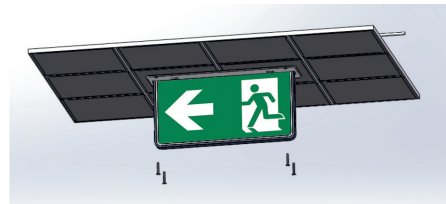

Plug the wire into the slot and use self-tapping screws to secure the sign to the ceiling .

4

Fasten the panel upwards and press gently to fix it.

5

After finishing installation, turn on power to examine whether the sign can work normally.
